(54) Title: METHOD OF MANUFACTURING A SECURITY THREAD HAVING AN EMBEDDED MICROCHIP, SECURITY  
THREAD AND DOCUMENT COMPRISING THE THREAD

(57) Abstract: The invention relates to a method of manufacturing a security thread (1) having a microchip (2), comprising the steps of providing a support material on a substrate; softening said support material, preferably by heating said support material; depositing a microchip (2) on or at least partly in the softened support material; and curing said support material, preferably by cooling said support material. The invention also relates to the security thread (1) manufactured by the method, and to a document, preferably a paper document, comprising that security thread.

### \* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*G\* document member of the same patent family
